

## The Scientific School

### **"Problems of Semantics in Structural and Functional Information**

#### **Theory Context"**

The scientific school "Problems of Semantics in Structural and Functional Information Theory Context" was founded in 1985 by Professor Dmytriy Kveselevych, Doctor of Sciences (Philology) and is currently headed by head of English Philology and Translation Department, professor Angelina Syngayivska, PhD. Since then one senior doctoral dissertation and twenty two PhD dissertations have been successfully defended.

The research done by the scientists is characterized by a complex multiaspect analysis of language units in conformity with department topics: "Topical Problems of Two-Language (Ukrainian-English) Educational Lexicography", "Cognitive and Communicative Aspect of Modern English Vocabulary Research", "Problems of Language Systems Evolution and Functioning in Multicultural Environment", "Research of Cognitive, Functional and Pragmatic Peculiarities of English Language: Lingvocultural and Comparative Aspects".

The scientific school has its logical continuation in the workings of scientific and research center of functional linguistics founded in 1999 and scientific and research laboratory "Theoretical and Applied Aspects of Linguistic Manipulation Research" in 2011.

The members of the scientific school carry out scientific and methodological work. Just in recent 5 years more than 300 scientific works were published, namely 200 articles in specialized editions, 8 monographs, more than 50 study guides certified by Ministry of Education in Ukraine. The researchers take part in different scientific seminars and conferences both in Ukraine and abroad. It has become a good tradition to organize annual Ukrainian conference in the memory of professor Dmytriy Kveselevych, Doctor of Sciences (Philology), where Ukrainian and foreign scientists have an opportunity to share their achievements, discuss latest linguistic accomplishments, debate problematic issues.

The researchers of scientific school collaborate with different higher educational establishments in Ukraine and abroad, international organizations and foundations, cultural centers of embassies, they take an active part in international exchange programs (IREX, Fulbright), have post-graduate training in the best universities of the world.

Thus, the scientific school is fruitfully operating, making profound contribution in Ukrainian linguistic science with systematic thorough investigations and preparing a new pleiad of scientists.
